

## TeleHealthPass

### 24/7/365 Access to Doctors

HP USA's telemedicine partners provide access to U.S. board-certified physicians and pediatricians via phone or online video consultation. Telehealth services are only a call or click away!

Physicians in our national network are U.S. board-certified family practitioners, PCPs, pediatricians and internists who use electronic health records to diagnose, treat, and write prescriptions, when necessary.

### Lowers Cost & Adds Convenience

As many as 66% of urgent care and emergency room visits are unnecessary; instead, members can be effectively treated with a telephone or video consultation through telemedicine. By shifting the unnecessary visits to HP USA and our telemedicine partner, employers can dramatically reduce healthcare cost.

Employees can address common medical issues without leaving work. HP USA's services are the most cost effective and convenient healthcare access.

- Lower annual health care costs
- Reduced employee absenteeism
- Enhanced productivity
- No open enrollment period
- No denials or preexisting conditions

### Convenience

- Save money otherwise spent on more expensive urgent care and ER visits (and a qualified expense for HSA, FSA and HRA accounts).
- Save time waiting to get an appointment and then waiting again in a waiting room.
- Save the hassle of driving across town and taking time off work.

**Average call back: 21 mins**

**Patient satisfaction: 98%**
